Ronald L. Coats Director James Morales, Jr. Director

John Mura, General Manager/CEO

November 10, 2020

To the Board of Directors and Customers of East Valley Water District,

We are pleased to submit the Comprehensive Annual Financial Report (CAFR) for East Valley Water District for the year ended June 30, 2020. This report was prepared by District staff in accordance with standards established by the Governmental Accounting Standards Board.

The District's management is responsible for the presented data, and the completeness and fairness of the presentation, including the note disclosures. We believe that the report presented is accurate in all material respects, and that the financial statements and other information are presented in a manner that enables readers to gain a full understanding of the District's financial activities for the year. Readers should also refer to the Management's Discussion and Analysis in the Financial Section of the CAFR for a detailed discussion regarding the District's financial condition and results of operations.

The CAFR follows the guidelines recommended by the Government Finance Officers Association (GFOA) of the United States and Canada. In November 2020, the District will, again, submit the CAFR to this organization for review and possible recognition for achievement in reporting excellence.

Background

East Valley Water District (the District) was formed on January 18, 1954, and since then, has provided retail water service to customers in an expanding service area which now covers 30.1 square miles. The District directly serves treated water to approximately 103,000 people in the City of Highland, the eastern portion of the City of San Bernardino, the San Manuel Band of Mission Indians, and portions of the County of San Bernardino. In 1964, the District began providing wastewater collection services to the same service area.

As of June 30, 2020, the District had 21,507 water connections and 19,679 wastewater connections.

Water Supply and Reliability

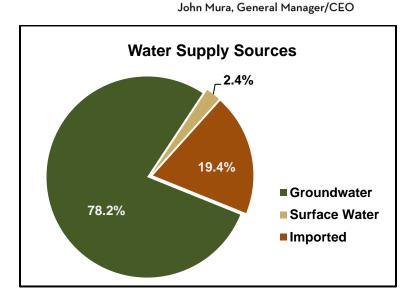

The District's water supply for the year ended June 30, 2020 includes groundwater (78.2 percent), surface water (2.4 percent), and imported water (19.4 percent). Groundwater is pumped from the Bunker Hill Basin, and surface water from the Santa Ana River is diverted based on rights acquired from the North Fork Water Company.

BOARD OF DIRECTORS

David E. Smith President Phillip R. Goodrich Chris Carrillo Vice President Director Ronald L. Coats Director James Morales, Jr. Director

Local Economy

East Valley Water District is located within San Bernardino County in a metropolitan area referred to as the "Inland Empire". Since 2011, the District's population has grown by more than 59 percent and currently, comprised of mostly residential and commercial customers, with no major industrial users. Large consumers remain consistent year to year with the San Bernardino City Unified School District, Patton State Hospital, San Manuel Mission Indians, East Highlands Ranch, and the City of Highland, forming the list of top five users.

In 2020, the average household income within the District's service area was \$47,000, approximately 21% lower than the County of San Bernardino. Customers who reside in the City of Highland account for approximately 65% of the District's customer base. These customers had an average household income of \$55,000, approximately 17% higher than the overall District average.

Financial Management

The District manages its resources conservatively in order to deliver safe and reliable services to its customers at a fair and cost-effective price. It focuses on establishing fair rates, cost containment, long-term planning, maintaining and upgrading infrastructure, and pursuing alternative source of funding. This approach has allowed the District to undertake substantial capital improvement projects during tough economic times, while passing a series of modest rate increases. The keys to the District's successful financial management are the District's Capital Improvement and Financial Plan (CIFP), comprehensive reviews of water and wastewater rates, and the annual budget process. The CIFP provides a comprehensive view of infrastructure investments necessary over a seven-year period to ensure that water resources are adequate, water quality is maintained, and the water and wastewater service needs of current and future customers are met. The CIFP is reviewed annually by the District's Board of Directors (the

David E. Smith President Phillip R. Goodrich Vice President Chris Carrillo Director Ronald L. Coats Director James Morales, Jr. Director

Board) during the budget process, at which time the highest priority projects are adopted and receive authorization for expenditure along with the District's operating budget.

The District's financial planning also includes the establishment and funding of reserves, and the pursuit of alternative funding sources, both of which help reduce reliance on rates and rate increases. In recent years the District has been very successful in pursuing project funding from the State Revolving Fund and Federal Emergency Management Agency (FEMA), and have applied for water and energy efficiency project funding from the Bureau of Reclamation and Edison.

Internal Control

District management is responsible for establishing a system of internal accounting controls designed to provide reasonable assurances that assets of the District are safeguarded against losses from unauthorized use or disposition, and theft. The District's internal controls also ensure the proper recording of financial transactions, and the preparation of financial statements in accordance with generally accepted accounting principles. The District's internal control structure is designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that 1) the cost of a control should not exceed the benefits likely to be derived and 2) the valuation of costs and benefits requires estimates and judgments by management.

Budgetary Control

The District's Board of Directors annually adopt a balanced operating and capital budget prior to the new fiscal year. The budget authorizes expenditures and provides a basis for accountability over the District's enterprise operations and capital projects. Each quarter, management provides the Board with a quarterly budget review to allow Board assessment of staff's progress in meeting goals and objectives, and budget adjustments, if necessary, are requested at the mid-year budget review in February.

Debt Administration

The District utilizes proceeds from long-term debt, along with reserves and contributions from the operating budget, to finance major construction projects. Current debt consists of Revenue Bonds and loans from US Bancorp, the State Revolving Fund, and the San Bernardino Valley Municipal Water District.

The District received a credit rating of AA- from Standard and Poor's and Fitch when the Revenue Bonds were issued in June 2013. This rating was affirmed by Fitch as the result of a review conducted in July 2020.

Investment Policy

The Board of Directors annually adopts an investment policy that conforms to California State Law, District ordinances and resolutions, and the prudent person standard. The objectives of the policy are safety, liquidity, and yield. District funds are normally invested in the State Treasurer's Local Agency Investment Fund (LAIF), and Federal government Treasury notes or agency obligations.

Audit and Financial Reporting

State law requires the District to obtain an annual audit of its financial statements by an independent Certified Public Accountant. This year, the District's Financial statements were audited by CliftonLarsonAllen LLP from Glendora, California. Their audit opinion is included in the Basic Financial Statements section of this report.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a *Certificate of Achievement for Excellence in Financial Reporting* to the District for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2019. This was the seventh year that the District has achieved this prestigious award. To be awarded a Certificate of Achievement, a governmental entity must publish an easily readable and efficiently organized Comprehensive Annual Financial Report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgements

Preparation of this report was accomplished by the combined efforts of District staff. We appreciate the dedication and professionalism that our staff bring to the District. We would also like to thank the members of the Board of Directors for their continued support in the planning and implementation of the financial affairs of the District.

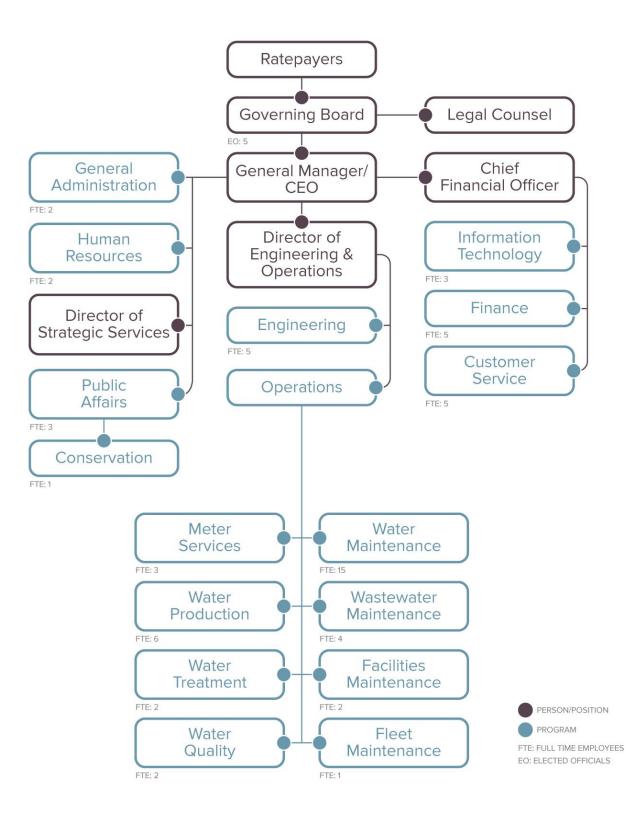

Respectfully submitted,

John Mura

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of June 30, 2020, and the respective changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Prior Period Comparative Information

We have previously audited the District's 2019 financial statements and we expressed an unmodified opinion on those audited financial statements in our report dated October 1, 2019. In our opinion, the partial comparative information presented herein as of and for the fiscal year ended June 30, 2019, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplementary information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the District's basic financial statements. The introductory section, the supplementary information as listed in the table of contents, and the statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information, as listed in the table of contents is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information, as listed in the table of contents, is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

EAST VALLEY WATER DISTRICT Independent Auditor's Report Year Ended June 30, 2020

Board of Directors East Valley Water District Page 3

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated November 10, 2020 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the District's internal control over financial reporting and compliance.

Clifton Larson Allen LLP

CliftonLarsonAllen, LLP

Glendora, California November 10, 2020

The District

East Valley Water District (District) is a California Special District established under section 30000 et seq. of the California Water Code. The District is engaged in pumping, treating, and distributing water to its customers, as well as maintaining a collection system for residential and commercial wastewater that is delivered for treatment at a plant owned by the City of San Bernardino Water Department.

The District serves the City of Highland and portions of the City and County of San Bernardino in California.

The Basic Financial Statements

East Valley Water District is a special-purpose government agency, engaged in activities that are supported exclusively by user charges. As such, the District's financial statements are presented in the format prescribed for proprietary funds by the Governmental Accounting Standards Board (GASB).

The following financial statements for the year ended June 30, 2020 (2019 for comparative purposes only) consist of three interrelated statements designed to provide the reader with relevant, understandable data about the District's financial condition and operating results. They are the Statement of Net Position, the Statement of Revenues, Expenses, and Changes in Net Position, and the Statement of Cash Flows.

The Statement of Net Position presents financial information on the District's assets, liabilities, and deferred inflow and outflows of resources, with the difference reported as net position as of the last day of the District's fiscal year. Over time, increases or decreases in net position can serve as a useful indicator of whether the financial position of the East Valley Water District is improving or deteriorating.

The Statement of Revenues, Expenses, and Changes in Net Position presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows.

The Statement of Cash Flows (direct method) conveys to financial statement users how the District managed cash resources during the year. This statement converts the change in net position presented on the Statement of Revenues, Expenses, and Changes in Net Position into actual cash provided by or used for operations. The Statement of Cash Flows also details how the District obtains cash through financing and investing activities, and conversely, how cash is spent for these purposes.

Summary Financial Information and Analysis

Financial Condition

During the year ended June 30, 2020, the District's total assets increased by \$55.2 million, to \$272.1 million, and included increases to Current, Restricted, and Capital asset categories.

Current assets increased 2% to \$39.5 million. The increase is almost entirely in a single line item – Due From Other Governments. This receivable is related to a funding agreement with the California State Water Resources Control Board (SWRCB) for the District's Sterling Natural Resource Center (SNRC) recycled water project. The receivable balance of \$18.9 million is accumulated construction costs paid by the District but not yet reimbursed by the SWRCB. District staff is working with staff at the SWRCB to minimize the turnaround time for reimbursement claims.

Restricted Asset balances increased from \$8.2 to \$10.2 million. The increase is the result of developer capacity fees received, primarily from a large hotel being built within the District's service area. The nature of Restricted Cash balances at June 30, 2020 are further detailed in Note 3 of the financial statements.

	2020		2019	
Current Assets	\$	39.5	\$	38.6
Restricted Assets		10.2		8.2
Other Assets		0.3		0.3
Capital Assets - Net		222.0		169.7
Total Assets		272.0		216.8
Total Deferred Outflow of Resources		4.1		3.6
Current Liabilities		18.5		11.5
Non-Current Liabilities		121.0		85.0
Total Liabilities		139.5		96.5
Total Deferred Inflows of Resources		0.7		0.7
Net Position				
Net Investment in Capital Assets		106.7		95.4
Restricted		6.7		3.5
Unrestricted		22.5		24.3
Total Net Position	\$	135.9	\$	123.2

Capital Assets increased by \$52.3 million during the 2019-20 fiscal year. This amount is a net between capital additions of \$56.9 million, less \$6.6 million in charges for depreciation during the year. Capital additions during the year were primarily construction in progress on the SNRC. A more detailed description of capital spending is in the Capital Assets section of this analysis.

Total Deferred Outflow of Resources consists of pension contributions made after the most recent pension plan actuarial valuation, as well as differences between projected and actual earnings on pension plan investments and changes in assumptions. Deferred outflows increased as of June 30, 2020 because the District has adopted a plan to increase voluntary contributions against outstanding post-employment benefit obligations.

While current assets increased by \$1.0 million, current liabilities also increased by \$7.0 million, the result of a significant contractor invoice and retentions payable at year-end. The impact of these increases caused the District's current ratio to fall from 3.4:1 to 2.1:1. The large receivable from the SWRCB at year end also dropped the District's liquidity ratio from 1.6:1 at June 30, 2019, to 0.8:1 at June 30, 2020.

Non-Current Liabilities increased by \$36 million, the net effect of:

- \$37.9 million in new State Revolving Fund loans; less
- \$2.9 million in principal payments on outstanding debt; and
- \$1.0 million increase in employee post-retirement benefit obligations calculated in accordance with GASB statements number 68 (pensions) and 75 (retiree medical).

Pensions and OPEB (Other Post Employment Benefits) are further discussed in Notes 8 and 11 of the accompanying financial statements. Compensated absences and Long-term debt are further explained in financial statement Notes 6 and 5, respectively.

The District's total Net Position was \$135.9 million at the end of fiscal year 2020, a \$12.7 million increase compared to the end of the previous fiscal year. Of the \$135.9 million Net Position balance, \$106.7 million is categorized as

Net Investment in Capital Assets, \$6.7 million is Restricted for Capital Expansion Projects, and \$22.5 million is Unrestricted. The calculation of Net Investment in Capital Assets is included in Note 7 of the accompanying financial statements.

Looking at longer term results, the District's total Net Position has increased \$22.9 million and \$36.5 million over five and ten year periods, respectively.

Activities and Changes in Net Position

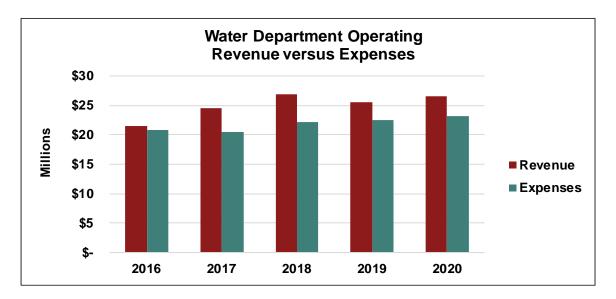

Water Operations

California emerged from four years of severe drought in the winter of 2017 with the Governor lifting a 'state of emergency' and declaring an end to the drought on April 7, 2017. The total volume of water sold by the District in 2016-17, the final year of the drought, was 16,223 acre-feet. In the ensuing 2017-18 fiscal year, consumption by District customers reached its highest levels since 2014 when water sales increased 13% to 18,361 acre-feet, likely because of the lifting of the state of emergency. However, though the drought had ended, conservation measures remained, as did the District's water budget based, tiered rates which were adopted in March 2015 and are designed to make inefficient use of water more expensive. As a result, water consumption dropped significantly in fiscal year 2018-19 to 16,167 acre-feet.to billed as inefficient use at the District's highest rates totaled \$4.4 million.

Water sales for fiscal year 2019-20 increased slightly, 3.2% to 17,037 acre-feet, or \$16.9 million in water sales revenue. Total water produced by the District during the year was 17,596 acre feet, with the difference between water produced and water sold of 904 acre feet being the result of District flushing programs, water use at District facilities, and system leaks.

The COVID-19 pandemic was likely a factor in the small increase in consumption as students and many employees within the District's service area were asked to work from home for the last four months of the fiscal year. With 94.1% of the District's customer accounts being residential, making up 79.1% of sales, extra time at home resulted in more indoor water use. To accommodate this, the District Board acted to temporarily increase residential customer water budgets, from 60 gallons per capita per day (gpcd) to 75 gallons, recognizing that customers spending more time at home would result in a higher need for Tier 1 (indoor health and safety) water use. This action gave residential customers 25% more water billed at the cheapest priced rate tier for the months April through June.

Water System, or Meter Charge revenue increased by only 0.15% to finish at \$9 million for fiscal year 2019-20. These are fixed charges assessed to each account, and no rate adjustments were effective for these charges during the year, so revenue was relatively the same as the prior year as was projected.

Water Department operating expenses increased 3.2% to \$23.2 million for fiscal year 2019-20. Overall, water operations were affected by an increase in purchases of State water for delivery at its surface water treatment plant to utilize a newly commissioned hydro-electric generation facility. In addition, the District increased voluntary contributions toward post employment benefit obligations which affected costs across all programs and departments. Specific cost fluctuations included:

- <u>Source of Supply:</u> purchased water costs increased 101.5% to \$816 thousand for state project water delivered to the District's surface water treatment plant.
- <u>Pumping:</u> power costs for boosting water to higher pressure zones continued to decrease as water more water production was shifted to the surface water treatment plant from wells.
- <u>Transmission & Distribution (T&D)</u>: costs increased 22.7% because of two line items Labor and Contract Services. Labor increased because two field staff, previously meter reader positions, transitioned to maintenance as the automated metering project nears completion. Contract Services increased due to a higher number of main leaks that required assistance from on-call contractors.

Wastewater Operations

Wastewater operating revenues consist of System Charges and Treatment Charges, and Other Operating Revenue.

System Charge rates are set by the District to cover the cost of maintaining the District's wastewater collection system and to cover a portion of administrative and general expenses. Treatment Charge rates are established by the City of San Bernardino Water Department, which treats the wastewater generated by the District's customers – the District currently has no wastewater treatment facilities. All wastewater treatment revenues collected by the District are directly offset by remittance payments to the City of San Bernardino Water Department, therefore, wastewater treatment has no net effect on the District's operating results.

Other Operating Revenue includes inspections, plan checking, and other development related fees, and also periodic reimbursements from other public agencies or utilities for shared costs or participation in conservation programs. In fiscal year 2018-19, Other Operating Revenue included a \$453 thousand reimbursement for costs

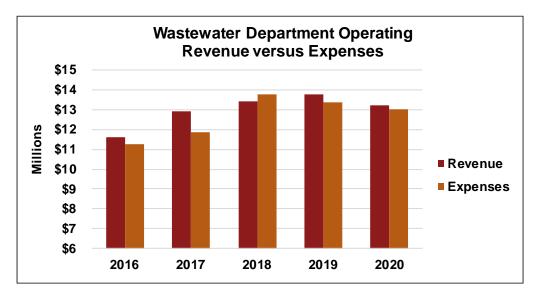

incurred on a joint project, the reason prior year Other Operating Revenue were significantly higher than in the 2019-20 fiscal year.

Rate related wastewater revenue during the 2019-20 fiscal year decreased \$93 thousand (0.7%), from \$13.2 to \$13.1 million. This result is a net effect between an increase in system charges, and a decrease in treatment charges.

System charges, assessed by the District for maintenance of wastewater collection mains, increased by 0.07% as a result of an increase in water usage by commercial customers. Commercial customers, which include multi-family residential complexes larger than three units, are billed for wastewater charges based on water consumption. The rate charged to commercial customers is the same for all customer types at \$0.55 per hundred cubic feet. As discussed above, increased usage was generally residential, so multi-family complexes had the greatest effect on system charge revenue.

Wastewater treatment revenues and costs, both fell 1.1% to \$8.5 million in fiscal year 2019-20. As with billing for system charges, commercial customer bills have a component based on water consumption, but the consumptions based rates vary, based on customer types - charges to multi-family complexes being the lowest, and restaurants and hotels being the highest due to the nature of wastewater discharged. Restaurants were forced to limit operations with the outbreak of COVID 19, therefore, decreased treatment charge revenue from restaurants and other high discharge businesses led to decreased wastewater treatment revenue.

Wastewater collection line maintenance costs increased by 9.5% compared to the prior year. This change is the result of higher Labor costs as the District increase the number of full-time employees charged to the program from two to four.

Shared Customer Account & Administrative Costs

Costs related to Customer Accounts (Water & Wastewater Operations) decreased \$201 thousand, or 10.4%, due primarily to the elimination of a position in the Customer Service Department and a significant reduction in the number of costly final notices to delinquent customers delivered. The number of notices was reduced, not because

of a reduction in the number of delinquent customers, but because of legislation (SB998) and an Executive Order by the Governor of California prohibiting the disconnection of delinquent customers during the COVID 19 pandemic.

Administrative and general costs for the District decreased by 1.5% to \$10.6 million. The primary reasons for the decrease were a significant reduction in engineering contract services due to completion of water and sewer master plan updates and a transition to in-house project management with increasing staff capabilities. The District also ended turf replacement as one of its conservation programs which significantly reduced the cost of conservation programs.

Other significant changes in general and administrative costs included:

- 1. Legal Services decreased 31% as the District nears the end of negotiations to acquire shares in the North Fork Water Company from other shareholders.
- 2. Insurance costs increased 25.2%; an industry wide result of the costly California wildfires in 2019.
- 3. Labor and Contract Services in Public Affairs increased 24.7% as a Public Affairs manager position was created and filled, and consultants were hired to help staff update the District's Emergency Response and Business Continuity plans.

Non-Operating Activities

The District's non-operating revenue of \$647 thousand includes investment earnings of \$525 thousand, and \$122 thousand in miscellaneous income and reimbursements. Non-operating expenses is \$1.58 million in interest on District long-term obligations.

East Valley Water District Changes in Net Position (in millions)

	2	2020	2	2019
Water Revenues	\$	26.6	\$	25.5
Water Operating Expenses		(23.1)		(22.5)
Wastewater Services		13.3		13.8
Wastewater Operating Expenses		(13.0)		(13.4)
Non-Operating Revenues		0.6		1.6
Non-Operating Expenses		(1.6)		(1.7)
Income Before Contributions & Special Item		2.8		3.3
Developer Contributions		3.2		0.6
Grant Funds Contributed		6.7	_	
Change in Net Position		12.7		3.9
Beginning Net Position, as Previously Reported	_	123.2	_	119.3
Ending Net Position	\$	135.9	\$	123.2

Investment earnings decreased 8.2% compared to the prior year due to the use of investible funds to prepay contractor costs on the SNRC project, costs which are being reimbursed under a State Water Resources Control Board (SWRCB) funding agreement. Earnings were also hampered by a decreasing interest rate paid by the California Local Agency Investment Fund, which dropped from 2.57% to 1.47% during fiscal year 2019-20.

Capital Contributions

Contributions received during fiscal year 2019-20 included \$3.2 million in developer capacity fees, and a \$6.8 million capital grant received from the SWRCB as part of the funding agreement mentioned above.

Components of Net Position

The District is required to present its net position in three categories: Net Investment in Capital Assets, Restricted, and Unrestricted.

Net Investment in Capital Assets

The components comprising Net Investment in Capital Assets are presented in Note 7 of the accompanying financial statements. The balance at June 30, 2020 is \$106.7 million, an increase of \$11.2 million compared to June 30, 2019. The increase is the net result of the acquisition or construction of capital assets for \$58 million, offset by a \$40.9 million increase in outstanding debt, and a net increase in accumulated depreciation of \$5.9 million.

Restricted

Restricted Net Position consists of unexpended development impact fees which may only be appropriated by approval of the Board of Directors for a project included in the District's Capital Improvement Program. A summary of the collection and use of these funds is presented as Other Information in this document.

Unrestricted

Unrestricted Net Position is the balance after amounts to be classified as Net Investment in Capital Assets or Restricted have been determined. Unrestricted Net Position decreased \$1.8 million to \$22.5 million in fiscal year 2019-20.

Capital Assets

The District spent approximately \$58 million for expansion or replacement of property, plant, and equipment during the 2019-20 fiscal year. These amounts are reflected in Utility Plant, or as additions to Construction in Progress, in the accompanying financial statements.

Placed in Service

During the 2019-20 fiscal year, District staff, consultants, and contractors completed work on the following:

- Installed Tank Mixers at Plant 108;
- Removed and replaced perimeter fence at Plant 134;
- Replaced third complete train of filtration membranes in Plant 134;
- Rehabilitated equipment and well at Plant 39A;
- Installed 4,685 new automated meters;
- Replaced 2,526 linear feet of water main; and
- Replaced 7,530 linear feet of sewer main.

Utility Plant in Service – June 30th (in millions)

Department	 2020	 2019
Water		
Source of Supply	\$ 19.1	\$ 18.9
Pumping	14.6	14.4
Transmission & Distribution	101.8	100.1
Treatment	28.5	28.2
Wastewater		
Collection Lines	27.6	27.5
General		
Buildings & Improvements	19.1	18.1
Equipment	9.8	9.8
Total	\$ 220.5	\$ 217.0

Construction in Progress (CIP)

Construction in progress increased \$51.21 million to \$88.95 million (see note 4) between June 30, 2019 and June 30, 2020. With approximately 17 projects in progress, additions to CIP totaled \$56.84 million, while \$2.13 million was capitalized and transferred to Utility Plant in Service.

Of the \$88.95 million balance in Construction in Progress at June 30, 2020, 85% is related to a single project, the Sterling Natural Resource Center.

The SNRC is a water recycling plant capable of converting six million gallons per day (mgd) of wastewater into recycled water that can be recharged into the local groundwater basin. Future phases will increase capacity of the plant to 10 mgd.

The SNRC project includes new interceptor mains to divert wastewater flows, treatment plant and administration facilities, solid waste digesters, and a recycled water pipeline for delivering water to recharge ponds. The total cost to build the project is approximately \$181 million. Through June 30, 2020, project costs totaled \$75 million.

Funding for the project will include a grant and low interest loan from the SWRCB totaling \$157 million, an \$18 million contribution for the basin water master for the recycled water pipeline, \$4.5 million from anticipated sales tax exclusions / Edison rebates, and \$1.5 million from District development impact fees or other reserves.

One other very important project is the installation of automated metering infrastructure (AMI). Five of seven phases of a plan to convert all District meters to remote read capability are completed and approximately three-quarters of the District's 22 thousand accounts have been converted. The District plans to complete the remaining phases by June of 2021.

Future Capital Improvements - Water

The District's ability to meet water quality requirements, promote water conservation, and increase efficiencies in conducting District business are the driving forces by which District management develops long term capital plans. To meet these objectives, the District's 5-year Capital Improvement Plan includes the following projects:

- Rehabilitation of District water storage tanks.
- Replacement of aging water distribution pipelines that require frequent repair and are suspected of causing system water losses.

Additional water storage capacity was identified in a water system master plan update as a top priority over the next five years. To address this issue, land has been purchased for a reservoir site, and discussions with developers include upsizing on their plans to provide storage for their project. The master plan also discussed the feasibility of building a new surface water treatment plant in the District's east end, closest to the source of surface water and to the largest areas of undeveloped land in the District's service area.

Future Capital Improvements - Wastewater

The District maintains a list of recommended wastewater main replacements / rehabilitations based on assessments of pipeline condition noted during video logging of the collections system. Pipelines assessed at the highest risk of structural failure are prioritized on the District's 5-year Capital Improvement Plan (CIP).

The District also completed an update to its Wastewater Collection System Master Plan in fiscal year 2018-19 which identified three wastewater pipelines that are susceptible to surcharging during heavy rains. Undersized pipelines can impede new development and will be included in discussions with developers as necessary.

Long Term Debt / Credit

The District's long-term debt at June 30, 2020 consists of Revenue Bonds issued through the East Valley Water District Financing Authority (Authority), a blended component unit, loans from the California Department of Water Resources (DWR), a capital lease purchase with US Bank, and a loan from the San Bernardino Valley Municipal Water District (SBVMWD). Outstanding balances as of June 30, 2020 were as follows:

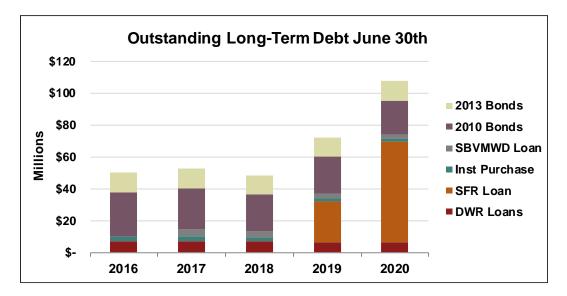

2010 Refunding Bonds	\$ 21,635,000
2013 Refunding Bonds	12,085,000
SBVMWD Loan	2,576,022
AVAD Construction	71,002
EFAD Construction	299,370
Plant 134 Construction	5,834,970
SNRC Construction	63,360,062
U.S. Bank Lease Purchase	 1,719,082
Total	\$ 107,580,508

On September 10, 2020 the District refinanced both the 2010 Revenue Bonds, in a current refunding, and the 2013 Revenue Bonds, in an advanced refunding, to take advantage of lower interest rates. The favorable pricing received through the refunding transaction will save the District approximately \$385,000 annually over the next 20 years. Note 5 to the accompanying financial statements explains the purposes for issuing all debt scheduled above.

The funding agreement with the State Water Resources Control Board for the SNRC construction consists of a \$150.3 million loan at 1.8% and a \$6.7 million grant, was finalized on November 21, 2019.

Debt service of \$6.8 million and plant operating expenses will be paid with \$8.7 million currently paid to the City of San Bernardino Water Department for wastewater treatment, Additional revenue streams will include Local Resource Investment Program payments received from the San Bernardino Valley Municipal Water Department for the use of recycled water produced by the plant for groundwater recharge, tipping fees from waste haulers who dispose of liquid waste at the District digesters, and energy cost avoidance through use of power produced by the digesters. The loan balance as of June 30,2020 is \$63.4 million; loan payments will begin one year after the Notice of Completion is filed for the SNRC.

All scheduled debt payments for fiscal year 2019-20 were paid timely.

Standard & Poor's and Fitch rated the District's 2020 Series A and B Revenue Bonds at AA- at the time of issuance. Dun & Bradstreet (D&B), based on audited financial statements and creditor input, also rated the District. The rating given by D&B is currently 5A1 accompanied by a financial condition assessment of 'strong', which is no change from previous years.

Rate Increases

The District has contracted with IB Consulting, LLC to perform water and wastewater utility Cost of Service Analysis'. The analysis' has determined the need for rate adjustments to current District water and wastewater rates, and will propose wastewater treatment rates to be established for the SNRC.

Additional information about the District's Water Budget based rate structure can be found on the District's website at <u>www.eastvalley.org</u>.

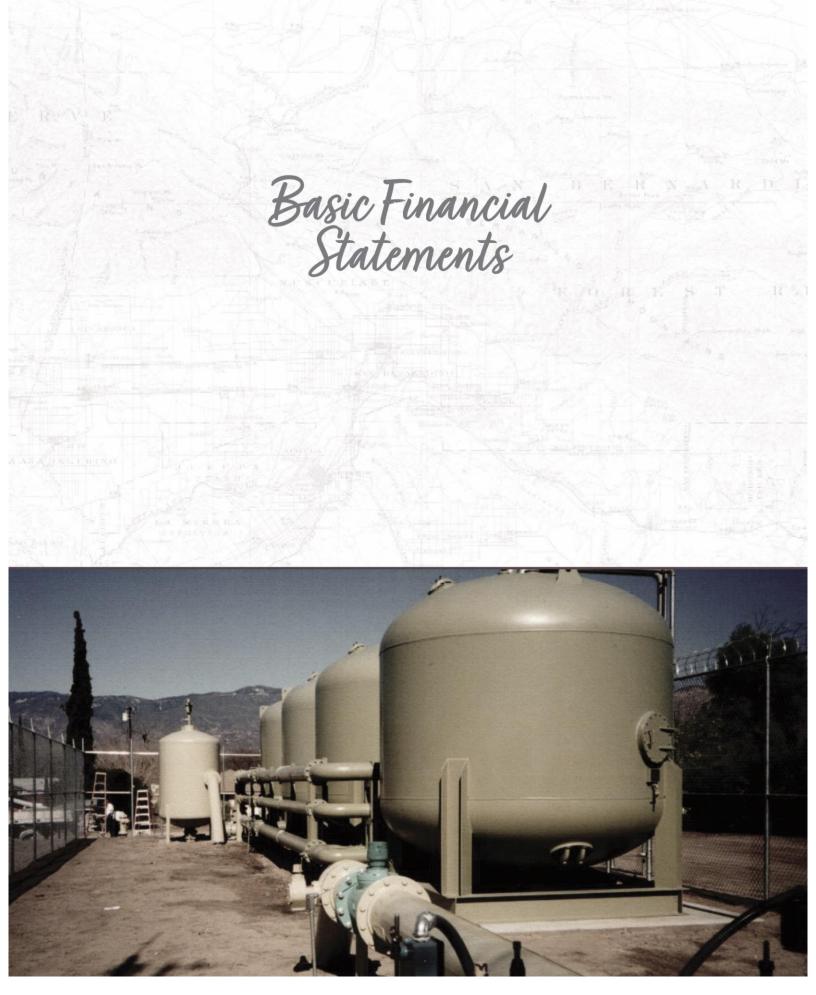

Contacting the District's Financial Management

This financial report is designed to give our customers / ratepayers, creditors, and investors a general overview of the District's finances, and to demonstrate the District's accountability for money it receives, and stewardship over facilities it maintains.

If you have questions about this report, or need additional information, contact the District's Finance Department at 31111 Greenspot Road, Highland, California 92346, or call (909) 381-6463.

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A) Reporting Entity

The East Valley Water District is a special district that was formed in 1954, as a result of an election by local residents who desired water service by a public water agency. Later, as the population increased, a modern wastewater system was needed to replace the septic tanks used at the time. Citizens voted to give the District responsibility for that service. The District encompasses an area of approximately 30.1 square miles and provides water and wastewater service to the City of Highland, parts of the City of San Bernardino, and unincorporated parts of the County of San Bernardino, California.

The East Valley Water District Financing Authority (Authority), and the North Fork Water Company (Company) are component units of the East Valley Water District. A component unit is an entity which is financially accountable to the primary government, either because the primary government appoints a voting majority of the component unit's Board, or because the component unit will provide a financial benefit or impose a financial burden on the primary government. The Authority, and Company are blended component units. Only North Fork Water Company prepares separate financial statements.

The Authority was created in August 2010 by a joint exercise of powers agreement for the purpose of financing public capital improvements. It is governed by a Board of Directors comprised of the District's Board of Directors. The Authority issued debt in October 2010 which is secured solely from installment payments under an installment purchase agreement entered into by the District and the Authority.

The Company was established in February 1885 to deliver water, taken from the Santa Ana River, to its property owner /shareholders. The Company is governed by a Board of Directors comprised of, and elected by, Company shareholders. The District has purchased shares of Company stock as they become available in order to secure rights to the Santa Ana River water and have it delivered to the District's surface water treatment plant. At June 30, 2020, the District owned 6,613.15 of 7,156 outstanding Company shares.

Due to the number of Company shares owned, the District is able to appoint a majority of the Company's Governing Board and is therefore, financially accountable for the Company. In addition, management and staff of the District have complete responsibility for the operations of the Company. As a result, the Company's financial statements have been included in the accompanying financial statements as a blended component unit. Copies of the Company's financial statements may be obtained from the District's Finance Department at 31111 Greenspot Road, Highland, California 92346.

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

The following condensed combining schedule shows how the District and its component units are blended in the accompanying financial statements:

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

B) Measurement Focus, Basis of Accounting and Financial Statement Presentation

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The District uses the economic resources measurement focus and the accrual basis of accounting. Accordingly, revenues are recognized when they are earned and expenses are recorded when the liability is incurred.

C) Comparative Data

Prior year data has been included where practical for comparison purposes only. The prior year data does not represent a complete presentation in accordance with accounting principles generally accepted in the United States of America.

D) Inventory Valuation

Inventories are valued at cost using the average-cost method.

E) Capitalization and Depreciation

Capital assets purchased or constructed by the District are recorded at cost. Donated capital assets are recorded at acquisition value as of the date received. The District has a capitalization threshold of \$5,000.

Depreciation is computed using the straight-line method over the estimated useful lives of the various assets. Water canals, water, and wastewater lines are depreciated over 25 to 50 years; office equipment and vehicles are depreciated over 5 years.

Water stock and rights contributed to the District are recorded at the same value the District is currently paying for the purchase of similar stock.

F) Restricted Assets

Certain assets of the District are restricted in use by ordinance or debt covenant and accordingly are shown as restricted assets on the accompanying statement of net position. Unexpended Bond proceeds are set aside for capital improvements, District deposits into Bond trustee accounts are to be used for debt service, and utility deposits must be returned to the customers at their request after their account has been paid timely for 12 consecutive months, or when their account is closed.

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

G) Cash and Cash Equivalents

For the purposes of the statement of cash flows, cash and cash equivalents have been defined as demand deposits and highly liquid investments purchased with an original maturity of 3 months or less. The District invests funds with the Local Agency Investment Fund (LAIF) and Money Market Mutual Funds. Due to the high liquidity of these investments, these funds are classified as cash equivalents.

H) Investments

The District has adopted the provisions of GASB Statement No. 72, Fair Value Measurement and Application. The objective of this Statement is to enhance comparability of financial statements among governments by measurement of certain assets and liabilities at their fair value using a consistent and more detailed definition of fair value and accepted valuation techniques. The definition of fair value is the price that would be received to sell and asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This Statement establishes a hierarchy of inputs to valuation techniques used to measure fair value.

I) Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position includes a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to future periods and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has three items which qualify for reporting in this category; Deferred Outflows Charge on Refunding, Deferred Outflows Related to Pensions, and Deferred Outflows Related to OPEB.

In addition to liabilities, the statement of financial position includes a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District has two items which qualify for reporting in this category: Deferred Inflows related to Pensions and Deferred Inflows related to OPEB.

J) Compensated Absences

The District has a policy whereby an employee can accumulate unused sick leave and vacation. Sick leave is to be used for extended periods of sickness; however, upon termination or retirement, a portion will be paid as additional benefits to the employee. At retirement or termination, employees who have accumulated over ten years of service will be paid between 50 to 70% of their unused sick leave (based upon their balance of unused sick leave) at their regular payroll rates in effect at the date of termination. Also, employees can cash out up to 300 hours of unused sick time, per calendar year, provided that a minimum of 160 hours is retained after said cash-out. The District has provided for these future costs by accruing a range of the earned and unused sick leave and 100% of the earned and unused vacation.

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

K) Classification of Revenue

As an enterprise (proprietary) fund, the District classifies its revenues into three classifications: operating revenue, non-operating revenue, and contributions.

Operating revenues are defined as revenues realized by the District in exchange for providing its primary services of water distribution and wastewater collection to its customers. Non-operating revenues are those derived from the investment of cash reserves and from the disposal of excess property, and also include those resources received from entities other than customers, such as governmental agencies and developers, for purposes not related to capital improvement. Donated plant and cash received for capital improvement without the requirement that the District give resources in exchange are recorded as contributions.

L) Use of Restricted Resources

The District uses restricted resources, prior to using unrestricted resources, to pay expenses meeting the criteria imposed on the use of restricted resources by a third party.

M) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

N) Pension

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the District's California Public Employees' Retirement System (CalPERS) plans (Plans) are additions to/deductions from the Plans' fiduciary net position and have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms.

O) Postemployment Benefits Other Than Pensions (OPEB)

For purposes of measuring the District's OPEB liability related to the California Employer's Retirement Benefits Trust (CERBT), deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the CERBT and additions to/deductions from the CERBT fiduciary net position have been determined on the same basis as they are reported by the CERBT. For this purpose, the CERBT recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

1) REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

P) Future Accounting Pronouncements

The applicable GASB Statements listed below will be implemented in future financial statements:

GASB Statement	Description	Effective Date
Statement No. 84	Fiduciary Activities	The statement improves guidance regarding the recognition of fiduciary activities for accounting and financial reporting purposes by establishing criteria for identifying fiduciary activities of all state and local governments. The statement is effective for reporting periods beginning after December 15, 2018. Earlier application is encouraged.
Statement No. 87	Leases	The statement addresses accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The statement is effective for reporting periods beginning after December 15, 2019. Earlier application is encouraged.
Statement No. 89	Accounting for Interest Cost Incurred before the End of a Construction Period	The statement requires that interest costs incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest costs incurred before the end of a construction period will not be included in the historical costs of a capital asset reported in a business-type activity or enterprise fund. The statement is effective for reporting periods beginning after December 15, 2019. Earlier application is encouraged.

Table 1-2

REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

P) Future Accounting Pronouncements

GASB Statement	Description	Effective Date
Statement No. 90	Majority Equity Interests - an amendment of GASB Statements No. 14 and No. 61	The statement modifies previous guidance for reporting a majority equity interest in a legally separate organization and provides guidance for reporting a component unit if 100 percent equity interest is acquired in that component unit. The statement is effective for reporting periods beginning after December 15, 2018. Earlier application is encouraged.
Statement No. 91	Conduit Debt Obligations	The statement provides a single method of reporting conduit debt to eliminate diversity in reporting and the related note disclosures. The statement also addresses arrangements - often characterized as leases - that are associated with conduit debt obligations. The statement is effective for reporting periods beginning after December 15, 2020. Earlier application is encouraged.
Statement No. 95	Postponement of the effective Dates of Certain Authoritative Guidance	Provides temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. That objective is accomplished by postponing the effective dates of certain provisions in Statementsx and Implementation Guides that first became effective or are scheduled to become effective for periods beginning after June 15, 2018, and later.

Table 1-2 - Continued

2) CASH AND INVESTMENTS

Cash and Investments as of June 30, 2020 are classified in the accompanying financial statements as follows:

Table 2-1

Cash and Cash Equivalents	\$ 8,777,977
Restricted Cash and Cash Equivalents	10,195,046
Investments	 5,683,093
Total	\$ 24,656,116

Cash and investments as of June 30, 2020 consist of the following:

Table 2-2	
Cash on Hand	\$ 5,250
Deposits with Financial Institutions	3,424,484
Money Market Accounts with Financial Institutions	222,002
Investments with Local Agency Investment Fund	15,321,287
Investment in Debt Securities	 5,683,093
Total	\$ 24,656,116

Investments Authorized by the California Government Code and the District's Investment Policy

The table below identifies the investment types that are authorized by the District's investment policy and in accordance with Section 52601 of the California Government Code The table also identifies certain provisions of the District's investment policy that address interest rate risk and concentration of credit risk.

Table 2-3

	Maximum	Authorized	Required
Authorized Investment Type	Maturity	Limit	Rating
Bonds and Certificates of Participation by EVWD	5 years	None	None
U.S. Treasury Bills, Notes, or Bonds	5 years	None	None
State Registered Warrants, Notes, or Bonds	5 years	None	None
Notes and Bonds of other Local California Agencies	5 years	None	None
U.S. Agencies	5 years	None	None
Negotiable Certificates of Deposits	5 years	30%	None
Money Market Mutual Funds and Mutual Funds	5 years	15%	2 - AAA
Collateralized Bank Deposits	5 years	None	None
Local Agency Investment Fund (LAIF)	N/A	None	None

At June 30, 2020, the District had no investments in repurchase agreements and did not utilize this investment media during the reporting year. As a matter of investment policy, the District does not borrow funds through the use of reverse repurchase agreements.

2) CASH AND INVESTMENTS - Continued

Disclosures Relating to Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the District minimizes its exposure to this type of risk is by investing in investments with laddered maturity dates.

As of June 30, 2020, the District had the following investments and maturities:

Investment Type	Fair Value	Average Maturity
Fannie Mae	\$ 554,164	2.01 years
Freddie Mac	601,595	3.19 years
Federal Home Loan Bank	858,367	1.31 years
Federal Farm Credit Bank	1,300,697	2.19 years
US Treasury	1,923,867	1.49 years
Tenn Valley Authority	444,403	2.42 years
LAIF	15,321,287	N/A
Money Market Mutual Funds	222,002	N/A
	21,226,382	_

Table 2-4

Disclosures Relating to Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the minimum rating required by (where applicable) the California Government Code or the District's investment policy, and the actual rating as of year-end for each investment type.

Table 2-5

		Minimum Legal	Exempt From	Rating at Year End	
Investment Type	Fair Value	Rating	Disclosure	AAA	Not Rated
Fannie Mae	\$ 554,164	N/A	\$-	\$ 554,164	\$ -
Freddie Mac	601,595	N/A	-	601,595	-
Federal Home Loan Bank	858,367	N/A	-	858,367	-

Money Market Mutual Funds	222,002	N/A		222,002	
	\$21,226,382		\$ 1,923,867	\$3,981,228	\$15,321,287

2) CASH AND INVESTMENTS - Continued

Fair Value Measurements

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. These principles recognize a three-tiered fair value hierarchy, as follows:

- Level 1: Investments reflect prices quoted in active markets;
- Level 2: Investments reflect prices that are based on a similar observable asset either directly or indirectly, which may include inputs in markets that are not considered to be active; and
- Level 3: Investments reflect prices based upon unobservable sources.

Valuation Technique: Level 2 Investments use the Market Approach which uses prices generated for identical or similar assets or liabilities.

The District has the following recurring fair value measurements as of June 30, 2020:

Table 2-6

	Fair Val			
	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	
Investments by Fair Value Level	(Level 1)	(Level 2)	(Level 3)	Total
Debt Securities				
Fannie Mae	\$-	\$ 554,164	\$-	\$ 554,164
Freddie Mac	-	601,595	-	601,595
Federal Home Loan Bank	-	858,367	-	858,367
Federal Farm Credit Bank	-	1,300,697	-	1,300,697
US Treasury	1,923,867	-	-	1,923,867
Tenn Valley Authority	-	444,403	-	444,403
Total Investments Measured at Fair Value	\$ 1,923,867	\$ 3,759,226	\$ -	\$ 5,683,093
Investments Measured at Amortized Cost				
LAIF				15,321,287
Money Market Mutual Funds				222,002
Total Investments				\$21,226,382

Disclosure Related to Concentration of Credit Risk

The District's policy places no limits on amounts invested in any given issuer beyond that stipulated by the California Government Code. At June 30, 2020, there were no investments (other than external pools, U.S. Government Securities and Money Market Mutual Funds) that exceeded 5% of the District's total investments.

2) CASH AND INVESTMENTS - Continued

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The California Government Code requires California banks and savings and loan associations to secure deposits by pledging government securities as collateral. Such collateralization of public funds is accomplished by pooling. As such, collateralized securities must equal at least 110% of Districts deposits. California law also allows financial institutions to secure deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits. The District may waive collateral requirements for deposits which are fully insured by Federal depository insurance.

As of June 30, 2020, the District had \$9,285,794 deposited with financial institutions that were in excess of federal depository insurance limits. The federal deposit insurance limit is \$250,000.

Investment in State Investment Pool

The management of the State of California Pooled Money Investment Account (generally referred to as LAIF) has reported to its participating agencies that, as of June 30, 2020, the carrying amount (at amortized cost) of the pool was \$101,607,078,218 and the estimated fair value of the pool was \$101,607,078,218. The District's proportionate share of the fair value (as determined by LAIF) as of June 30, 2020, was \$15,321,287. Included in LAIF's investment portfolio are collateralized mortgage obligations, mortgage-backed securities, other asset-backed securities, loans to certain State funds, and floating rate securities issued by federal agencies, government-sponsored enterprises, and corporations.

3) RESTRICTED CASH AND CASH EQUIVALENTS

Restricted cash and cash equivalents at June 30, 2020 are restricted as follows:

Table 3-1

Held for Debt Service	\$ 1,659,286
Capacity Fees from Developers	6,499,353
Customer Deposits	1,563,518
Construction Advances	186,663
North Fork Water Company	 286,226
Total	\$ 10,195,046

4) CAPITAL ASSETS

A summary of changes in capital assets for the year ended June 30, 2020 is as follows:

Table 4-1

	Beginning of Year	Additions	Deletions	End of Year
Water Fund		·		
Non-Depreciable Assets

Total	\$74,360,852	\$37,871,030	\$ (2,769,899)	\$109,461,983	\$2,849,143	\$106,612,840

2010 Refunding Revenue Bonds

On October 29, 2010, the District issued \$33,545,000 of East Valley Water District Financing Authority Refunding Revenue Bonds, Series 2010 (2010 Bonds), with interest rates ranging from 2.00% to 5.00%. The purpose for issuing the 2010 Bonds was to provide \$16,000,000 for future capital improvements, and for refunding virtually all the District's outstanding long-term debt. The refunded debt included 1) \$5,935,000 in 2001 Certificates of Participation bearing interest rates ranging from 4.25% to 5.00%, 2) a \$7,867,528 balance on a 2004 Installment Sale Note bearing interest at 4.50%, and 3) a \$5,109,854 balance on a 2006 Installment Sale Note bearing interest at 4.95%.

The refunding portion of the 2010 Bonds (\$17,170,000) were issued at a premium of \$1,630,726, and after paying issuance costs of \$318,849, net proceeds were \$18,481,877. The net proceeds, combined with a \$920,318 sinking fund for 2001 COP debt service, were sufficient to accomplish the refunding of the existing debt. All refunded debt has been retired leaving \$0 of outstanding in-substance defeased debt.

The refunding resulted in a difference between the reacquisition price and the carrying amount of the old debt of \$259,548. This difference is included in the accompanying financial statements as a Deferred Outflows of Resources and is being charged to operations through the year 2024 using the straight-line method of amortization. The indenture authorizes, upon default, the Trustee to declare immediate due and payable the total unpaid principal of the Bonds and accrued interest thereon.

5) LONG-TERM DEBT - Continued

2013 Revenue Bonds

On June 19, 2013 the District issued \$12,085,000 of East Valley Water District Financing Authority Revenue Bonds, Series 2013 (2013 Bonds), with interest rates ranging from 4.00% to 5.00%. The purpose for issuing the 2013 Bonds was to provide financing for water and wastewater capital improvements, primarily construction of a new administration and operations headquarters complex. The indenture authorizes, upon default, the Trustee to declare immediate due and payable the total unpaid principal of the Bonds and accrued interest thereon.

US Bank Lease Purchase

On November 13, 2013 the District entered into a Lease Purchase Agreement with US Bancorp Government Leasing and Finance, Inc. (US Bank), in order to implement Energy Conservation Measures (ECM) identified in a comprehensive energy conservation and operational efficiency study prepared by Honeywell International, Inc. (Honeywell). Honeywell has been contracted to install the facilities necessary to achieve the energy savings identified in their study, and has guaranteed that the savings will be sufficient to pay the debt service on the lease with US Bank. Project costs paid to Honeywell, and the amount borrowed from US Bank under the lease agreement is \$3,998,560 with an interest rate of 2.38%. Semi-annual payments are \$226,398, to commence on September 2014 through March 2024. The indenture authorizes, upon default, the Trustee to declare immediate due and payable the total unpaid principal of the Bonds and accrued interest thereon.

San Bernardino Valley Municipal Water District - City Creek Turnout and Plant 134 Hydroelectric Station Loan

On January 20, 2015, the District entered into an agreement with the SBVMWD for the construction, financing, and maintenance of a turnout by which the District's surface water treatment plant can receive State Project water. The total amount borrowed for construction of the project is \$4,367,927 bearing interest at the State of California Local Agency Investment Fund (LAIF) apportionment rate, which is 1.47% at June 30, 2020. Debt service payments are to be made annually on February 1st over ten years.

Department of Water Resources Contract 00C412 - Arroyo Verde Assessment District (AVAD)

On June 30, 2004, the District entered into a Funding Agreement for replacement of distribution pipelines in the section of the District's service area formerly served by the Arroyo Verde Water Company. The original loan amount was \$169,052 with an annual interest rate of 0%. Semi-annual payments of \$3,381 are due through January 2031 and are secured by annual assessments to property owners within the Arroyo Verde Assessment District. The indenture authorizes, upon default, the Trustee to declare immediate due and payable the total unpaid principal of the Bonds and accrued interest thereon.

Department of Water Resources Contract 10CX110 - Plant 134

On December 21, 2010, the District entered into a Funding Agreement to upgrade treatment methods utilized by the District's surface water treatment plant (Plant 134). The amount borrowed under the agreement is \$7,001,964 with an annual interest rate of 0%. Semi-annual payments of \$116,699 are due through January 2045, and are secured by a pledge of net revenues of the District's water operating fund. The indenture authorizes, upon default, the State to declare immediate due and payable the total unpaid principal of the debt

5) LONG-TERM DEBT - Continued

and accrued interest thereon.

Department of Water Resources Contract 11CX101 - Eastwood Farms Assessment District

On June 15, 2011 the District entered into a Funding Agreement for replacement of distribution pipelines in the section of the District's service area formerly serviced by the Eastwood Farms Water Users Association. The amount of the loan is \$390,482 with an annual interest rate of 0%. Semi-annual payments of \$6,508 are due for 30 years through January 2043. Repayment of the loan is secured by annual assessments to property owners within the Eastwood Farms Assessment District. The indenture authorizes, upon default, the Trustee to declare immediate due and payable the total unpaid principal of the Bonds and accrued interest thereon.

The aggregate debt service requirements to maturity for long-term debt as of June 30, 2020 are as follows (excludes unamortized premiums/discounts and the California State Water Resource Control Board Contract C-06-8106-110):

Table 5-2

Year Ending			
June 30,	Principal	Interest	Total
2021	\$ 2,748,555	\$ 1,609,845	\$ 4,358,400
2022	2,243,008	1,529,485	3,772,493
2023	2,302,672	1,468,447	3,771,119
2024	2,362,550	1,405,128	3,767,678
2025	1,958,176	1,342,223	3,300,399
2026-2030	6,741,902	5,970,934	12,712,836
2031-2035	7,100,452	4,815,388	11,915,840
2036-2040	9,002,070	3,231,100	12,233,170
2041-2045	9,761,060	1,055,750	10,816,810
	\$ 44,220,445	\$ 22,428,300	\$ 66,648,745

California State Water Resources Control Board Contract C-06-8106-110 – Sterling Natural Resource Center

On June 26, 2018 the District entered into a Funding Agreement for the construction of a 6 million gallon per day (mgd) water recycling plant with the State Water Resources Control Board. The initial agreement approves \$11.5 million for design cost reimbursement, with a revised agreement covering design and construction costs

5) LONG-TERM DEBT - Continued

totaling \$157 million executed on December 2, 2019. The revised Agreement includes a \$6.7 million grant and a low interest (1.8%) loan for the balance of \$150.3 million.

As of June 30, 2020 the District has incurred \$70.4 million in design and construction cost, the District has drawn approximately \$51.5 million, \$18.9 million is awaiting reimbursement (Due From Other Governments) of the \$150.3 million in Ioan financing available. Repayment on the Ioan will begin one year after the completion of construction and annual installment payments of principal and interest are projected to be approximately \$6.8 million. The District has pledged available water and wastewater revenue for the repayment of the Ioan, including the following new revenue streams:

- Wastewater treatment charges (previously paid to the City of San Bernardino)
- Sale of electrical energy produced by plant digesters (beyond energy used on site)
- Local Resource Investment Program fees for recycled water delivered for groundwater recharge
- Tipping fees from waste haulers

Estimated debt service on this loan is not included in the Table 5-2 above.

Security for debt is as follows:

Table 5-3

Debt	Security
2010 and 2013 Refunding Revenue Bonds and Department of Water Resources Construction Loans	The District is required to maintain net revenues, as defined by the revenue bond trust agreements and State of California Department of Public Health Funding agreements of at least 120% of District's annual debt service (principal and interest). At June 30, 2020, net water revenues represented 266% of the annual water debt service and net wastewater revenues represented 3,448% of the annual wastewater debt service.

6) COMPENSATED ABSENCES

Compensated absences are comprised of unused vacation leave and a limited amount of sick leave which is accrued as earned in accordance with District policy. The District's liability for compensated absences is determined annually. Current portions are determined based on estimates of usage, amounts in excess of 196 hours that will be voluntarily cashed out and amounts that will be cashed out upon termination of employment.

Table 6-1

	Beginning of Year	Additions	Usage / Payments	End of Year	Current Portion	Long-Term Portion
Accrued Vacation Leave	\$486,255	\$555,413	\$(332,837)	\$708,831	\$359,043	\$ 349,788
Accrued Sick Leave	471,023	408,181	(599,045)	280,159	175,426	104,733
Total	\$957,278	\$963,594	\$(931,882)	\$988,990	\$534,469	\$ 454,521

7) NET INVESTMENT IN CAPITAL ASSETS

Net Investment in capital assets at June 30, 2020 consisted of the following:

Table 7-1

Non-Depreciable Capital Assets	\$ 96,255,683
Depreciable Capital Assets	220,587,523
Accumulated Depreciation	(95,029,151)
Loans Payable	(79,613,249)
Bonds Payable	(35,598,861)
Deferred Amount on Refunding	 106,610
Total	\$ 106,708,555

8) DEFINED BENEFIT PENSION PLAN (PERS)

A) General Information about the Pension Plans

Plan Description

All qualified permanent and probationary employees are eligible to participate in the District's Miscellaneous Employee Pension Plans, cost-sharing multiple employer defined benefit pension plans administered by the California Public Employees' Retirement System (CalPERS). Benefit provisions under the Plans are established by State statue and East Valley Water District resolution. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions, and membership information that can be found on the CalPERS website.

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full-time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after 10 years of service. The death benefit is one of the following: the Basic Death Benefit, the 1957 Survivor Benefit, or the Optional Settlement 2 W Death Benefit. The cost of living adjustments for each plan are applied as specified by the Public Employees' Retirement Law.

The Plans' provisions and benefits in effect at June 30, 2020, are summarized as follows:

	Miscell	aneous
	Prior to	On or after
Hire Date	January 1, 2013	January 1, 2013
Benefit Formula	2.7% @55	2.0% @62
Benefit Vesting Schedule	5 years service	5 years service
Benefit Payments	monthly for life	monthly for life
Retirement Age	50 - 55	52 - 67
Monthly Benefits, as a % of Eligible Compensation	2.0% to 2.7%	1.0% to 2.5%
Required Employee Contribution Rates	8.0%	6.5%
Required Employer Contribution Rates	12.805%	7.026%

Table 8-1

8) DEFINED BENEFIT PENSION PLAN (PERS) – Continued

Contributions

Section 20814(c) of the California Public Employees' Retirement Law requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. Funding contributions for both Plans are determined annually on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The District is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

For the year ended June 30, 2020, the contributions recognized as part of pension expense for the Plans were as follows:

Table 8-2

	Misc	Miscellaneous		
Contributions - Employer	\$	1,798,495		

B) Pension Liabilities, Pension Expenses, and Deferred Outflows/Inflows of Resources Related to Pensions

As of June 30, 2020, the District reported net pension liabilities for its proportionate shares of the net pension liability of the Plans as follows:

Table 8-3

	•	ionate Share of ension Liability
Miscellaneous	\$	11,805,140

The District's net pension liability for each Plan is measured as the proportionate share of the net pension liability. The net pension liability of each of the Plans is measured as of June 30, 2019, and the total pension liability for each Plan used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2018 rolled forward to June 30, 2019 using standard update procedures. The District's proportion of the net pension liability was based on a projection of the District's long-term share of contributions to the pension plans relative to the projected contributions of all participating employers, actuarially determined. The District's proportionate share of the net pension liability for each Plan as of June 30, 2019 was as follows:

Т	ab	le	8-4	1

	Miscellaneous
	Prior to
	January 1, 2013
Proportion - June 30, 2018	0.287816%
Proportion - June 30, 2019	0.294797%
Change - Increase (Decrease)	0.006981%

8) DEFINED BENEFIT PENSION PLAN (PERS) – Continued

For the year ended June 30, 2020, the District recognized pension expense of \$1,361,184. At June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Table 8-5

	Deferred Outflows of Resources		Deferred Inflows of Resources		
Difference between expected and actual experience	\$	819,917	\$	63,527	
Changes in Assumptions		562,924		199,552	
Net differences between projected and actual earnings on plan investments		-		206,390	
Change in employer's proportion		168,426		79,580	
Difference between the employer's contributions and the employer's proportionate share of contributions		182,612		133,547	
Pension contributions subsequent to measurement date		1,798,495		-	
Total	\$	3,532,374	\$	682,596	

\$1,798,495 reported as deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows:

Table 8-6

Year Ended	
June 30,	 Amount
2021	\$ 868,636
2022	(17,128)
2023	148,104
2024	 51,671
	\$ 1,051,283

8) DEFINED BENEFIT PENSION PLAN (PERS) – Continued

Actuarial Assumptions

The total pension liabilities in the June 30, 2018 actuarial valuations were determined using the following actuarial assumptions:

	Tabl	le	8-7
--	------	----	-----

	Miscellaneous
Valuation Date	June 30, 2018
Measurement Date	June 30, 2019
Actuarial Cost Method	Entry Age Normal
Asset Valuation Method	Market Value of Assets
Actuarial Assumptions:	
Discount Rate	7.15%
Inflation	2.50%
Payroll Growth	Annual increase vary by Category, entry age and duration of service
Projected Salary Increase	2.5
Investment Rate of Return (1)	7.15%
Mortality Rate Table ⁽²⁾	Derived using CalPERS' membership data for all Funds

- ⁽¹⁾ Net of pension plan investment expenses and administative expenses; including inflation
- (2) The Mortality table used was developed based on CalPERS-specific data. The table includes 15 years of mortality improvements using Society of Actuaries Scales 90% of scale MP2016. For more details on this table, please refer to the December 2017 experience study report (based on Cal PERS demographic data from 1997 to 2015) that can be found on the CalPERS website.

Discount Rate

The discount rate used to measure the total pension liability remained the same at 7.15%. To determine whether the municipal bond rate should be used in the calculation of a discount rate for the plan, CalPERS stress tested plans that would most likely result in a discount rate that would be different from the actuarially assumed discount rate. Based on the testing, none of the tested plans run out of assets. Therefore, the current 7.15% discount rate is adequate and the use of the municipal bond rate calculation is not necessary. The long term expected discount rate of 7.15% will be applied to all plans in the Public Employees Retirement Fund (PERF). The stress test results are presented in a detailed report that can be obtained from the CalPERS website.

CalPERS continues the Asset Liability Management (ALM) process to expand its review of assets and liabilities to ensure financial risks to the System are better understood, communicated, and mitigated. To establish appropriate levels of risk, ALM is focused on investment and actuarial policies. These policies include key decision factors and intend to drive optimum asset allocations, while stabilizing employer contribution rates, and the volatility of those rates year to year. Additionally, to better manage risks arising from terminating agencies, CalPERS has enhanced its oversight of contracting public agencies' financial health through its development of a standardized review criteria. These improvements include streamlining the collection and termination process to reduce the timeframe, accelerating notifications to the Board and

8) DEFINED BENEFIT PENSION PLAN (PERS) - Continued

members, and adopting a risk oversight process to improve early detection of financial hardship issues.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS considered both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all funds' asset classes, expected compound (geometric) returns were calculated over the short term (first 10 years) and the long term (11+ years) using a building-block approach. Using the expected nominal returns for both short term and long term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses.

The table below reflects the long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These rates of return are net of administrative expenses.

Asset Class	New Strategic Allocation	Real Return Years 1 - 10(a)	Real Return Years 11 + (b)
Global Equity	50.0%	4.80%	5.98%
Global Fixed Income	28.0%	1.00%	2.62%
Inflation Sensitive	0.0%	0.77%	1.81%
Private Equity	8.0%	6.30%	7.23%
Real Assets	13.0%	3.75%	4.93%
Liquidity	1.0%	0.00%	-0.92%
Total	100.0%		

Table 8-8

(a) An expected inflation of 2.0 % used for this period

(b) An expected inflation of 2.92 % used for this period

C) Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents East Valley Water District's proportionate share of the net pension liability for the Plan, calculated using the current discount rate, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one-percentage point lower or one-percentage point higher than the current rate:

8) DEFINED BENEFIT PENSION PLAN (PERS) – Continued

Table 8-9

	Mis	cellaneous
1% Decrease		6.15%
Net Pension Liability	\$	17,968,327
Current Discount Rate		7.15%
Net Pension Liability	\$	11,805,140
1% Increase		8.15%
Net Pension Liability	\$	6,717,865

D) Pension Plan Fiduciary Net Position

Detailed information about each pension plan's fiduciary net position is available in the separately issued CalPERS financial reports.

E) Payable to the Pension Plan

At June 30, 2020, the District reported a payable of \$0 for the outstanding amount of contributions to the pension plan required for the year ended June 30, 2020.

9) COMMITMENTS AND CONTINGENCIES

Grant Awards

Grant funds received by the District are subject to audit by the grantor agencies. Such audit could lead to requests for reimbursements to the grantor agencies for expenditures disallowed under terms of the grant. Management of the District believes that such disallowances, if any, would not be significant.

10) RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omission; injuries to employees; and natural disasters. The District participates in a joint powers agreement (JPA) with the Special District Risk Management Authority (Authority). The Authority is a risk-pooling selfinsurance authority created under the provisions of California Government Code Section 6500 et. sec. The Authority is governed by a Board consisting of 7 directors that are either a manager or Board member of a current member agency that were elected by members of SDRMA. The Board controls the operations of the Authority including selection of management and approval of operation budgets. The relationship between the District and the Authority is such that the Authority is not a component unit of the District for financial reporting purposes. Settled claims have been immaterial and claims liabilities have not been reported in these financial statements as of June 30, 2020, or in the previous two fiscal years.

10) RISK MANAGEMENT - Continued

The purpose of the Authority is to arrange and administer programs of insurance for the pooling of self-insured losses and to purchase excess insurance coverage.

At June 30, 2020, the District's participation in the self-insurance programs of the Authority was as follows:

Description			Limits	Deductible	
Personal Injury and	\$	10,000,000	Per occurrence /	\$500 (property	damage
Property Damage Liability Coverage - General			aggregate where applicable	only)	
Personal Injury and Property Damage Liability Coverage - Auto	\$	10,000,000	Per accident	None	
Public Officials and Employees Errors and	\$	10,000,000	Per wrongful act / annual member aggregate	None	
Employment Practices Liability	\$	10,000,000	Per wrongful employment practice / aggregate limits per member included with Public Officials and Employee Errors and Omissions Coverage	None up to \$10 50% co-insurar \$10,000 to \$50 none for amour greater than \$5	nce from ,000, nts
Employee Benefits Liability	\$	10,000,000	Per wrongful act / annual member aggregate	None	
Employee Dishonesty Coverage	\$	1,000,000	Perloss	None	
Public Officials Personal Liability	\$	500,000	Per occurrence / annual aggregate per Board	\$	500
Automobile Physical Damage		ACV Limits	Replacement cost (stated value adjusted for depreciation on selected vehicles)	\$250/\$500 or \$500/\$1,000 comprehensive collision (as ele per vehicle)	
Uninsured Motorist Bodily Injury Coverage	\$	750,000	Per accident	None	
Property Coverage	\$ 1	1,000,000,000	Replacement cost for scheduled property if replaced (if not replaced within two years, actual cash value basis)	\$	1,000
Boiler and Machinery	\$	100,000,000	Replacement cost	\$	1,000

Table 10-1

11) POST EMPLOYMENT HEALTHCARE BENEFITS

The District provides post employment healthcare benefits for retired employees and eligible surviving spouses in accordance with the plan as established by the District. As of June 30, 2020, the District's total liability for post-employment healthcare benefits and details of the plan are explained below:

Table 11-1

	Net OPEB	Defe	erred Outflows	Defer	red Inflows of		OPEB
OPEB Plan	Liability	O	f Resources	R	esources	E	Expense
Retiree Benefits Plan	\$ 2,096,677	\$	436,587	\$	62,612	\$	247,849

Plan Description and Eligibility

The District contributes to the retiree health coverage of eligible retirees and eligible surviving spouses. As of June 7, 2011, the District is part of the Public Agency portion of the California Employers' Retiree Benefit Trust Fund (CERBT), an agent multiple-employer plan administered by California Public Employees' Retirement System (CalPERS), which acts as a common investment and administrative agent for participating public employers within the State of California. A menu of benefit provisions as well as other requirements is established by State statute within the Public Employees' Retirement Law. The District selects optional benefit provisions from the benefit menu by contract with CalPERS and adopts those benefits through District resolution. CalPERS issues a Comprehensive Annual Financial Report (CAFR). The CAFR is issued in aggregate and includes the sum of all CalPERS plans. Copies of the CalPERS CAFR may be obtained from the CalPERS Executive Office, 400 P Street, Sacramento, California 95814.

Membership in the health benefit plan consisted of the following at July 1, 2019, the date of the latest actuarial valuation:

Table 1	1-2
---------	-----

Participant Type:	Number of Participants
Inactive participants currently receiving benefits	26
Inactive participants entitled to but not yet receiving benefit	0
Active employees	65
Total	91

Funding Policy

The contribution requirements of plan members and the District are established and may be amended by the Board of Directors. At retirement, the District provides the minimum employer contribution under the CalPERS Health Program for eligible retirees and surviving spouses in receipt of a pension benefit from CalPERS. An employee is eligible for this employer contribution provided they are vested in their CalPERS pension benefit and commence payment of their pension benefit within 120 days of retirement with the District. Vesting requires at least five years of service. The surviving spouse of an eligible retiree who elected spouse coverage under CalPERS is eligible for the employer contribution upon death of the retiree.

Employees retiring with at least 10 years of District service will receive an additional District contribution through attainment of Medicare eligibility age. The additional contribution is based on the negotiated dollar amount at retirement (currently \$700 per month). The surviving spouse of an eligible retiree is eligible for the District's

11) POST EMPLOYMENT HEALTHCARE BENEFITS - Continued

contribution upon the death of the retiree through the spouse's attainment of Medicare eligibility age.

The District's funding policy is to contribute the Annual Determined Contribution (ADC) to their account within the CERBT. For fiscal year ended June 30, 2019, the District paid \$278,539 to the plan including the implicit rate subsidy. The District contributed \$436,587 including the implicit rate subsidy for retiree health benefits to the Trust during the fiscal year ended June 30, 2020.

Net OPEB Liability

The table herein shows the components of the net OPEB liability of the District:

Table 11-3

		Balance	
	June 30, 2020		
Total OPEB Liability	\$	2,896,822	
Plan Fiduciary Net Position		800,145	
District's Net OPEB Liability (Asset)	\$	2,096,677	

Investments

As described above, at June 30, 2020, all Plan investments are held in the CERBT through CalPERS.

Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At June 30, 2020, the District reported deferred outlflows of resources and deferred inflows of resources related to pensions from the sources as follows:

Table 11-4

	Deferred	Deferred
	Outflows of	Inflows of
Deferred Outflows and Inflows of Resources	 Resources	 Resources
Contributions subsequent to measurement date	\$ 262,358	\$ -
Differences between expected and actuarial experience	173,038	-
Changes of assumptions	-	59,216
Differences between projected and actual earnings on	 1,191	 3,396
Total	\$ 436,587	\$ 62,612

The deferred outflow of resources results from a change of assumptions and is amortized over the expected average remaining service life (EARSL) of the plan participants. The EARSL for the OPEB plan for June 30, 2020 is five years. The year of amortization is recognized in OPEB expense for the year the gain or loss occurs. The remaining amount is deferred and will be amortized over the remaining periods not to exceed four years.

11) POST EMPLOYMENT HEALTHCARE BENEFITS - Continued

The deferred inflows of resources related to OPEB resulting from the net differences between projected and actual earnings on the plan investents is amortized over a five year period on a straight-line basis. One-fifth is recognized in pension expense during the measurement period and the remaining amount is deferred and will be amortized over the remaining four-year period.

The deferred inflows of resources related to OPEB resulting from the net differences between projected and actual earnings on the plan investments is amortized over a five year period on a straight-line basis. One-fifth is recognized in pension expense during the measurement period and the remaining amount is deferred and will be amortized over the remaining four-year period.

Deferred inflows and outflows will be amortized as follow:

Year Ending June 30,	Ar	nortization
2021	\$	12,042
2022		12,040
2023		12,348
2024		11,953
2025		12,647
Thereafter		50,587
Total	\$	111,617

Table 11-5

Actuarial Methods and Assumptions

The District's net OPEB liability was measured as of June 30, 2019, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2019. Liabilities in this report were calculated as of the valuation date.

The total OPEB liability was determined by an actuarial valuation as of June 30, 2019, using the actuarial assumptions shown herein, applied to all periods included in the measurement, unless otherwise specified.

Table 11-6

Actuarial Methods and Assumptions	
Valuation Date	June 30, 2019
Measurement Date	June 30, 2019
Inflation	2.50%
Salary Increases	2.75%
Investment Rate of Return	6.50%
Health Care Trend Rate	6.50% HMO / 6.50% PPO

Mortality rates were based upon the rates under the CalPERS pensions plan updated to reflect the most recent experience study.

11) POST EMPLOYMENT HEALTHCARE BENEFITS - Continued

The long-term expected rate of return on Plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plan's target asset allocation at June 30, 2019 are shown herein:

Table 1	1	-7
---------	---	----

	Percentage of	Assumed Gross
Asset Class	Portfolio	Return
Global Equity	40%	5.50%
Global Debt Securities	43%	2.35%
Inflation Assets	5%	1.50%
Commodities	4%	1.75%
REITs	8%	3.65%

The discount rate used to measure the total OPEB liability was 6.50 percent. The discount rate assumes the District continues to fully fund for its retiree health benefits through the CERBT under its investment allocation strategy 2. The rate reflects the CERBT published median interest rate for strategy 2 with an additional margin for adverse deviation.

Changes in the Net OPEB Liability

OPEB Expense

For the year ended June 30, 2020, the District recognized OPEB expense of \$247,849 and recorded deferred outflows of resources of \$436,587 for contributions made during fiscal year 2020 after the measurement date. The deferred outflows will be recognized in OPEB expense for the period ending June 30, 2021.

The District recorded \$62,612 of deferred inflows of resources resulting from the differences between projected and actual earnings on OPEB plan investments for the period ending June 30, 2019. The deferred inflows of resources will be amortized and recognized in OPEB expense over three remaining periods ending June 30, 2023.

12) SUBSEQUENT EVENTS

On September 10, 2020 the District issued \$16,885,000 Refunding Revenue Bonds, Series 2020A and \$13,615,000 Refunding Revenue Bonds, Series 2020B (Federally Taxable). The issuance is for refunding the East Valley Water District Financing Authority Refunding Revenue Bonds, Series 2010, and 2013 in full; and to pay costs of issuance associated with the 2020A and 2020B Bonds while saving the District a potential \$9 million in debt service payments.

Table 12-1

Year Ended	Prior Debt		Refunding		•

East Valley Water District History and Organization Year Ended June 30, 2020

Formation of the District

The Board of Supervisors of San Bernardino County approved a petition in writing for the formation of the East Valley Water District (formerly East San Bernardino County Water District) under Division 12 of the Water Code of the State of California and ordered an election held January 12, 1954. The formation of the District was voted by the electors. The Board of Supervisors of San Bernardino County, by action on January 18, 1954, approved the formation of the District. Incorporation of the "East Valley Water District" was approved by the State of California on February 1, 1954.

East Valley Water District Financing Authority

The East Valley Water District Financing Authority (Authority) is a public body organized and existing under a Joint Exercise of Powers Agreement, and under the Constitution and laws of the State of California, between East Valley Water District and the California Municipal Finance Authority. The Authority was formed to assist in the financing and refinancing of capital improvement projects of the District for the use, benefit, and enjoyment of the public.

Nature of Business

The District has been engaged in the furnishing of water service and wastewater transmission services to its customers since inception.

Location

The District office is located at 31111 Greenspot Road, Highland, California. The office is situated within the District's boundaries which encompass an area of approximately 30.1 square miles within the County of San Bernardino, California.

Other Information

# EAST VALLEY WATER DISTRICT Capacity Charge Funds Year Ended June 30, 2020

# Capacity Charge Funds

Government Code Section 66013 requires local agencies that collect capacity charges to deposit and account for these fees in a separate capital facilities fund. In addition, local agencies are required to annual provide the information in this report to the public upon request. Government Code Section 66013 (b) (3) defines "Capacity charge" means a charge for public facilities at the time the charge is imposed or charges for new public facilities to be acquired or constructed in the future that are of proportional benefit to the person or property being charged, including supply or capacity contracts for rights or entitlements, real property interests, and entitlements and other rights of the local agency involving capital expense related to its use of the use of existing or new public facilities. "

Government Code Section 66013 (d) outlines the reporting requirements on the capital facilities funds and expenditures. Government Code Section 66013 (f) (2) exempts capacity charges that are used to pay existing debt service from the reporting requirements of Section 66013 (d). Two of the District's capacity charges are used to pay existing debt service; therefore, they are exempt from the reporting requirements. For the purpose of enhancing transparency, the District has provided the reporting information on its capacity charges that are exempt from Section 66013 (d).

The District has the following capacity charge funds:

**Water Capacity Fee Fund.** This fund collects System Capacity Charges for new water service connections to pay for proportionate shares of the District equipment replacements and facility improvements.

**Wastewater Capacity Fee Fund.** This fund collects a fee for the capacity used by new wastewater connections and the funds are used to pay for equipment replacements and facility improvements.

A summary of changes in Water Fund Capacity Fees collected for the year ended June 30, 2020 is as follows:
